

SITTERWISE

Caregiver Profile System

Technical Specification for Laravel Build

Prepared for: Aji (Laravel/PHP Developer)

Prepared by: Amy Gray, Owner/Director

Date: April 2026 | Version 1.0

Document Overview

This specification covers the complete Caregiver Profile System for the Sitterwise Laravel platform. It defines four interconnected data systems that feed into each caregiver's profile:

System A — Caregiver Application Form (applicant-facing, public)

System B — Automated Reference Collection (reference-facing, results are admin-only)

System C — Client Reviews & Star Ratings (client-facing, public on profile)

System D — Internal Staff Rating (admin-only, never shown to caregiver or client)

Integration — S2Verify Background Check API submission from admin dashboard

All four systems write to the same caregiver profile record. The admin dashboard displays the complete picture: application data, reference responses, client reviews, internal scores, and background check status.

Key principle: A caregiver never sees her reference responses, internal staff rating, or background check details. She sees her own application data, her client-facing star rating average, and her published reviews.

System A: Caregiver Application Form

The application form is the primary intake tool for new caregivers. It is publicly accessible (no login required) and captures everything needed to evaluate a candidate before scheduling an interview. Upon submission, the system triggers automated reference requests (System B).

A1. Application Flow Overview

The form is a multi-step wizard with progress indication. The applicant moves through steps sequentially using Back/Next buttons. All data is saved per-step so partial completions are recoverable.

Step	Content
Step 1	Sponsor & Applicant Info
Step 2	Position, Availability & Education
Step 3	Employment & Childcare Experience
Step 4	Screening Questions
Step 5	References (3 + sponsor = 4 total)
Step 6	Location Preferences & Age Groups
Step 7	Qualifications, Activities & Bio
Step 8	Agreements & Signature

A2. Step 1: Sponsor & Applicant Information

Sitterwise hires on a referral basis only. The sponsor (referring person) must be a current Sitterwise caregiver, Sitterwise client, or someone Sitterwise knows personally. The sponsor is treated as Reference #1 in the reference collection system.

Sponsor Fields

Field	Type	Req?	Notes
First Name	Text	Yes	Sponsor who referred the applicant
Last Name	Text	Yes	
Email	Email	Yes	Reference form will be sent here
Phone	Phone	No	NEW. Add phone for follow-up if email bounces
Relationship	Text	No	NEW. How does sponsor know applicant?

Applicant Fields

Field	Type	Req?	Notes
First Name	Text	Yes	
Last Name	Text	Yes	
Address	Address	Yes	Keep autocomplete. Store structured (street, city, state, zip).
Phone	Phone	Yes	
Email	Email	Yes	Unique identifier. Used for portal login later.
Date of Birth	Date	Yes	Required for S2Verify background check.
Profile Photo	File Upload	No	NEW. Headshot for admin reference during interview stage. Not published until approved.

RECOMMENDATION: Add a profile photo upload at the application stage. This helps you recognize applicants and speeds up the hiring process. The photo is admin-only until the caregiver is approved, at which point it becomes their public profile photo.

A3. Step 2: Position, Availability & Education

Position (check all that apply)

Field	Type	Req?	Notes
On-Call Babysitting	Checkbox	Min 1	
On-Call Petsitting	Checkbox	—	
Group Events	Checkbox	—	

Availability

Field	Type	Req?	Notes
General Availability	Multi-select	Yes	CHANGE from free text to structured checkboxes: Weekday Mornings, Weekday Afternoons, Weekday Evenings, Weekends, Overnights. Structured data is searchable/filterable; free text is not.
Availability Notes	Text	No	NEW. Optional free text for nuance (e.g., "not available Tuesdays").

IMPORTANT CHANGE: The current free-text availability field makes it impossible to filter or match caregivers by schedule. Structured checkboxes let the system match caregivers to jobs automatically.

Education

Field	Type	Req?	Notes
Highest Level	Dropdown	Yes	Options: Some High School, High School/GED, Some College, Associate Degree, Bachelor's Degree, Advanced Degree (MA, PhD)
High School Name	Text	No	
HS Graduation Year	Year	No	
College Name	Text	No	Show conditionally if education >= Some College
College Graduation Year	Year	No	Show conditionally
Degree / Major	Text	No	NEW. Show conditionally if education >= Associate. Useful context for matching (e.g., Early Childhood Education major).

A4. Step 3: Employment & Childcare Experience

Current Employment

Field	Type	Req?	Notes
Currently Employed?	Dropdown	Yes	Options: Yes full-time, Yes part-time, No, Student. Keep as-is.
Current Employer	Text	No	NEW. Show if employed. Helpful for scheduling context.

Childcare Experience (3 entries)

Each of the three experience entries collects the same fields. At least one experience is required. The prompt asks for the applicant's three most significant childcare experiences.

Field	Type	Req?	Notes
Start Date	Month/Year	Yes*	CHANGE from full date to month/year. Exact day is unnecessary.
End Date	Month/Year	Yes*	Allow "Present" option for ongoing roles.
Role Title	Text	No	NEW. E.g., "Nanny", "Daycare Teacher", "Au Pair". Gives quick context.
Family/Org Name	Text	No	NEW. Private if individual family; named if organization.
Description	Multi-line	Yes*	Keep current prompt: "Please explain your role and responsibilities. Include children's ages."
Ages Served	Multi-select	No	NEW. Checkboxes: Infant (0-1), Toddler (1-3), Preschool (3-5), School Age (5-12), Teen (13+). Enables automatic cross-reference with age group preferences in Step 6.

**At least Experience #1 is fully required. Experiences #2 and #3 are optional but encouraged.*

A5. Step 4: Screening Questions

These questions collect information that affects job matching and hiring decisions. All are required.

Field	Type	Req?	Notes
Do you smoke?	Yes/No	Yes	Keep as-is. Affects matching (non-smoking homes).
Do you drink alcohol?	Dropdown	Yes	Keep options: No, Socially/Occasionally, Regularly
Substance abuse history?	Multi-line	Yes	Keep as-is. Sensitive — explain this is confidential.
Physical/psychological limitations?	Multi-line	Yes	Keep as-is. Prompt: "Unable to lift, afraid of dogs, etc.?"
Allergic to dogs or cats?	Dropdown	Yes	Keep as-is. Affects petsitting eligibility.
Visible tattoos?	Yes/No	Yes	Keep as-is.
Authorized to work in the U.S.?	Yes/No	Yes	CHANGE wording from "U.S. Citizen" to "authorized to work." Citizenship is not the legal standard; work authorization is.
Reliable vehicle?	Yes/No	Yes	Keep as-is. Affects hotel job assignments.
CPR & First Aid certified?	Yes/No	Yes	Keep as-is. If yes, show conditional fields for cert expiration date and upload.
CPR Expiration Date	Date	Cond.	NEW. Show if CPR = Yes. Feeds into compliance monitoring.
CPR Card Upload	File	Cond.	NEW. Show if CPR = Yes. PDF or image.
Trustline certified?	Yes/No	Yes	Keep as-is. If yes, conditional upload.
Trustline Upload	File	Cond.	NEW. Show if Trustline = Yes.
Languages (other than English)	Text	No	Keep as-is.
Do you have children of your own?	Dropdown	No	NEW. Options: No, Yes (ages at home), Yes (grown). Relevant for scheduling and reliability.

CHANGE: "Are you a U.S. Citizen?" should be "Are you authorized to work in the United States?" The legal requirement is work authorization, not citizenship. Many excellent caregivers are permanent residents, visa holders, or DACA recipients.

A6. Step 5: References

The applicant provides three references. Combined with the sponsor from Step 1, this gives Sitterwise four reference contacts total. All four receive the automated reference form (System B).

Per-Reference Fields (x3)

Field	Type	Req?	Notes
First Name	Text	Yes	
Last Name	Text	Yes	
Email	Email	Yes	Reference form sent to this address.
Phone	Phone	Yes	Keep as-is. Backup contact method.
Relationship	Text	Yes	"In what capacity do you know this person?"
Duration	Text	Yes	"How long have you known this person?"

VALIDATION: The system should prevent the applicant from entering their own email as a reference. Cross-check reference emails against the applicant email.

Reference De-duplication

The system should also prevent duplicate email addresses across references. If a reference email matches the sponsor email, display a message: "This person is already listed as your sponsor and will receive a reference request."

A7. Step 6: Location Preferences & Age Groups

Location Preferences

Field	Type	Req?	Notes
North County	Checkbox	Min 1	Rancho Santa Fe, Del Mar, Carlsbad, Encinitas, Escondido, San Marcos, Vista
South/East County	Checkbox	Min 1	Coronado, Downtown, La Jolla, Mission Valley, Chula Vista, El Cajon, La Mesa
Flexible (in a pinch)	Checkbox	—	"Would you sometimes be willing to work at the other location group if we were in a pinch?"

Age Group Comfort (check all that apply)

Each age group includes a self-attestation statement. Checking the box means the caregiver agrees with the statement and is comfortable caring for that age group. These attestation texts should be stored as system content (not hardcoded) so they can be updated without a code change.

Field	Type	Req?	Notes
Babies	Checkbox + Text	—	Self-attestation re: diapers, bottles, safe sleep, soothing, handwashing
Toddlers	Checkbox + Text	—	Self-attestation re: safety awareness, patience, redirection
Preschool	Checkbox + Text	—	Self-attestation re: floor play, reading, potty training tolerance
School Age	Checkbox + Text	—	Self-attestation re: crafts, age-appropriate media, engagement

A8. Step 7: Qualifications, Activities & Bio

Additional Qualifications (check all that apply)

Each qualification includes a self-attestation description. Same principle as age groups: checking means agreeing.

Field	Type	Req?	Notes
Special Needs	Checkbox + Text	—	Autism, Down syndrome, ADHD, food allergies, anxiety, behavioral needs
Companion Care	Checkbox + Text	—	Elderly or adults with special needs
Sick Care	Checkbox + Text	—	Children slightly under the weather
Work-From-Home Parents	Checkbox + Text	—	Comfortable with parent in another room
Driving	Checkbox + Text	—	Can transport children safely
Dogsitting	Checkbox + Text	—	Comfortable with all sizes/breeds, walks, fetch
Catsitting	Checkbox + Text	—	NEW. Currently only dogs are listed. Add cats separately.
Swimming	Checkbox + Text	—	NEW. "I am comfortable supervising children in and around pools and at the beach. I am a strong swimmer and understand water safety."
Overnight Care	Checkbox + Text	—	NEW. "I am comfortable staying overnight with children. I understand bedtime routines and overnight responsibilities."

Activities

Field	Type	Req?	Notes
Things you bring to a job	Multi-line	No	Keep as-is. Prompt: "All caregivers should arrive prepared with toys, games, & activities."

Caregiver Bio

The bio is the caregiver's public-facing introduction sent to families. Keep the example bio from the current form. The AI-generated bio feature is a nice touch — keep the prompt and link to ChatGPT or Claude.

Field	Type	Req?	Notes
Bio	Multi-line	Yes	200-500 word target. Will be sent to families before jobs.
Interests / Hobbies	Text	No	NEW. Separate field for personal interests. Feeds into bio generation prompt and helps with family matching.

A9. Step 8: Agreements & Signature

Two separate agreements, each requiring typed signature, checkbox confirmation, and auto-populated date.

Agreement 1: Statement of Verification

Certifies that answers are true, authorizes investigation, understands false information is grounds for termination. Keep current language.

Agreement 2: Statement of Agreement

Independent contractor terms including: freedom to work elsewhere, no under-the-table work with Sitterwise families, availability commitment, rate agreement, no formal training relationship, CPR/Trustline requirement, independent contractor status (no benefits/insurance), and non-compete clause.

LEGAL NOTE: Have your attorney review the non-compete clause and independent contractor language periodically. California has strict non-compete laws (generally unenforceable for employees, but the IC relationship adds nuance).

Signature Fields (per agreement)

Field	Type	Req?	Notes
Typed Signature	Text	Yes	Must match applicant name from Step 1
Confirmation Checkbox	Checkbox	Yes	"By typing your name above, you agree..."
Date	Auto-populated	Auto	Today's date, not editable

On Submit

When the applicant clicks Submit:

- Create caregiver record with status = "Applicant" (not active, not visible to clients)
- Store all application data on the caregiver record
- Store signed agreements as PDF snapshots (generate from HTML, attach to profile)
- Trigger System B: send reference request emails to all 4 references (sponsor + 3)
- Send confirmation email to applicant: "Thank you for applying. We will review your application and be in touch."
- Send notification email to admin (amy@sitterwise.com): "New application received from [Name]. Reference requests sent."

System B: Automated Reference Collection

When a caregiver submits their application, the system automatically sends a reference request email to all four references (sponsor + 3 references from Step 5). Each reference receives a unique, tokenized link to a reference form. Their responses feed privately into the caregiver's profile – visible only to admin, never to the caregiver.

B1. Reference Request Email

Sent automatically upon application submission. Sitterwise-branded HTML email.

Property	Value
From	hello@sitterwise.com (via SendGrid)
Subject	Reference Request for [Applicant First Name Last Name]
Tone	Professional, warm, brief
CTA Button	"Complete Reference Form" → links to unique tokenized URL
Expiration	Link expires after 30 days. Reminder sent at 7 days and 14 days if not completed.

Email Content

[Applicant Name] has applied to join the Sitterwise caregiver team and listed you as a reference. Sitterwise is a trusted childcare agency serving San Diego families since 1981. Your honest feedback helps us ensure only the best caregivers work with our families. This form takes about 5 minutes.

*The reference should NOT know what the caregiver said about them (capacity, duration).
The reference form asks its own version of those questions to cross-check.*

B2. Reference Form Fields

The reference form is accessed via a unique tokenized URL. No login required. The applicant's name is pre-populated at the top of the form for context.

Field	Type	Req?	Notes
Your Name	Text (pre-filled)	Yes	Pre-filled from application data. Editable in case of typos.
Your Email	Email (pre-filled)	Yes	Pre-filled. Locked (non-editable).
Your Phone	Phone	No	For admin follow-up if needed.
How do you know [Name]?	Dropdown + Text	Yes	Dropdown: Family member, Friend, Former employer, Co-worker, Church/community,

			Client, Other. If Other, show text field.
How long have you known [Name]?	Dropdown	Yes	Options: Less than 1 year, 1-3 years, 3-5 years, 5-10 years, 10+ years
Have you seen [Name] interact with children?	Yes/No	Yes	Critical screening question.
If yes, describe what you observed.	Multi-line	Cond.	Show if above = Yes

Rating Questions (1-5 scale)

Each question uses a 1-5 star/dot rating. Labels: 1 = Poor, 2 = Below Average, 3 = Average, 4 = Good, 5 = Excellent.

Field	Type	Req?	Notes
Reliability / Dependability	1-5 Rating	Yes	Shows up on time, follows through
Trustworthiness	1-5 Rating	Yes	Honest, integrity, safe with children
Maturity & Judgment	1-5 Rating	Yes	Makes good decisions, handles situations well
Communication Skills	1-5 Rating	Yes	Clear, responsive, professional
Warmth with Children	1-5 Rating	Yes	Patient, engaging, nurturing
Overall Recommendation	1-5 Rating	Yes	"How strongly would you recommend [Name] as a childcare provider?"

Open-Ended Questions

Field	Type	Req?	Notes
Strengths	Multi-line	No	"What would you say are [Name]'s greatest strengths as a caregiver or as a person?"
Concerns	Multi-line	No	"Is there anything we should be aware of that might affect [Name]'s ability to provide excellent childcare?"
Additional Comments	Multi-line	No	"Anything else you'd like us to know?"
Would you trust [Name] with your own children?	Yes / No / N/A	Yes	Direct trust question. N/A if they don't have children.

B3. Reference Data Flow

Reference responses are stored on the caregiver profile with the following visibility rules:

- Admin: Sees all reference responses, ratings, and open-ended answers
- Caregiver: Never sees reference responses. Period.
- Client: Never sees reference responses.

The admin dashboard shows a reference summary card on each caregiver profile:

- Reference status: 0/4, 1/4, 2/4, 3/4, 4/4 completed
- Average rating across all completed references (single number)
- Individual reference detail expandable (click to read full responses)
- Flag: any reference who rated 2 or below on any question
- Cross-check alert: if reference's stated relationship/duration doesn't match what applicant entered

B4. Reminder & Expiration Logic

Field	Type	Req?	Notes
Day 0	Trigger	—	Application submitted → reference emails sent
Day 7	Reminder #1	—	"Gentle reminder: [Name] is waiting for your reference."
Day 14	Reminder #2	—	"Final reminder: This reference link will expire in 16 days."
Day 30	Expiration	—	Link deactivated. Admin notified of incomplete references.

System C: Client Reviews & Star Ratings

After a job is completed (caregiver checked out), the client is invited to rate and review their caregiver. Reviews are NOT public-facing — clients cannot see other caregivers' ratings or reviews. This protects caregivers from being compared or blackballed by one off night. The caregiver can see her own feedback (stars and written reviews), and admin sees everything.

VISIBILITY PRINCIPLE: Sitterwise matches caregivers to families — clients do not browse or compare. Client reviews are a quality management tool for admin and a growth/motivation tool for the caregiver, not a public marketplace rating.

C1. Review Request Trigger

Property	Value
Trigger	Caregiver checkout is completed for the job
Timing	Email/text sent 2 hours after checkout (gives family time to settle)
Channel	Email (primary) + SMS (secondary nudge at 48 hours if no response)
Expiration	Review link active for 14 days
Incentive	None required. Consider adding a "thank you" message after submission.

C2. Client Review Form

Field	Type	Req?	Notes
Overall Rating	1-5 Stars	Yes	Primary rating. Large, prominent star selector.
Punctuality	1-5 Stars	No	Optional sub-rating
Communication	1-5 Stars	No	Optional sub-rating
Engagement with Children	1-5 Stars	No	Optional sub-rating
Would You Book Again?	Yes / No	Yes	Binary. Feeds into caregiver matching priority.
Written Review	Multi-line	No	"Tell us about your experience with [Caregiver Name]." 500 char max.
Private Note to Sitterwise	Multi-line	No	"Anything you'd like to share privately with our team? This will NOT be shown to the caregiver." Admin-only.

C3. Review Visibility

- Admin: Sees all reviews, all star ratings, all private notes. Full moderation controls.
- Caregiver: Sees her OWN reviews and star ratings only. Cannot see other caregivers' reviews. Can see her overall average and individual review text.
- Client: CANNOT see any caregiver reviews or ratings. Clients trust Sitterwise to send the right caregiver.
- The "Private Note to Sitterwise" field is never visible to the caregiver
- Admin can hide individual reviews from the caregiver's view if needed (e.g., unfair or retaliatory reviews)

C4. Aggregate Rating Calculation

The caregiver's star rating is the weighted average of all Overall Ratings. Display as a number inside a star icon (e.g., 4.7) alongside the count of reviews (e.g., "23 reviews"). Sub-ratings (punctuality, communication, engagement) are shown as a breakdown on the admin profile and on the caregiver's own portal view.

C5. Admin Performance Dashboard

In addition to individual caregiver reviews, admin needs an aggregate view of Sitterwise's overall service quality. Build an admin dashboard widget that shows:

- Overall Sitterwise average rating across all caregivers ("How are we doing as a company?")
- Average rating trend over time (monthly chart – are we improving?)
- "Would Book Again" percentage across all reviews
- Top-rated caregivers (ranked by average rating, minimum 5 reviews to qualify)
- Caregivers with declining ratings (flagged if last 5 reviews average lower than all-time average)
- Review response rate: what percentage of clients leave a review when asked?

C6. Job Engagement Metrics

These metrics track each caregiver's activity level and responsiveness to job offers. They live on the caregiver's admin profile alongside the internal rating and review data.

Field	Type	Req?	Notes
Total Jobs Completed	Integer	Auto	Lifetime count of completed jobs. A measure of experience and commitment to the team.
Jobs Offered	Integer	Auto	Total job invitations sent to this caregiver (all-time).
Jobs Accepted	Integer	Auto	Total job invitations she accepted.

Jobs Declined/Ignored	Integer	Auto	Offered minus Accepted. Includes both active declines and non-responses.
Acceptance Rate	Percentage	Auto	Accepted / Offered. How often does she pick up jobs when offered?
Avg Response Time	Duration	Auto	Average time between job invitation sent and caregiver response (accept or decline). Fast responders are gold.
Jobs This Month	Integer	Auto	Rolling 30-day count. Shows current activity level.
Jobs This Quarter	Integer	Auto	Rolling 90-day count.
Last Job Date	Date	Auto	Date of most recent completed job. Flags inactive caregivers.
Days Since Last Job	Integer	Auto	Calculated. Alert if > 60 days for an Active caregiver.

These metrics are admin-only. The caregiver sees her own total job count and her own reviews, but NOT her acceptance rate, response time, or how she compares to others. This data is for your matching decisions.

System D: Internal Staff Rating

The internal staff rating is an admin-only scoring system that captures Sitterwise's own assessment of each caregiver. This is separate from client reviews and is never shown to the caregiver or to clients. It is used for job matching priority and internal decision-making.

CRITICAL: The internal rating is NEVER visible to the caregiver. This is the rating that determines whether she gets offered jobs before other caregivers, and it must be honest.

D1. Internal Rating Components

The internal rating is composed of three scored dimensions plus an overall score. Each dimension is rated 1-5 by admin staff.

Interview Score (set once, after interview)

Field	Type	Req?	Notes
Interview Rating	1-5	Yes	Overall impression from interview. Set by interviewer.
Interview Notes	Multi-line	No	Free-text notes from the interview. Admin-only.
Interviewed By	Text	Auto	Name of the staff member who conducted the interview.
Interview Date	Date	Auto	Date of interview.

Communication Score (updated ongoing)

This score reflects how responsive and professional the caregiver is in ongoing communication with Sitterwise. It should be updateable at any time.

Field	Type	Req?	Notes
Communication Rating	1-5	Yes	Does she respond to texts/calls promptly? Professional tone?
Last Updated	Date	Auto	Timestamp of most recent update to this score.
Notes	Multi-line	No	Optional context for the rating.

Reliability Score (calculated + adjustable)

This is the most dynamic score. It reflects whether the caregiver follows through on commitments.

Field	Type	Req?	Notes
-------	------	------	-------

Reliability Rating	1-5	Yes	Auto-calculated from job history, manually adjustable by admin.
Jobs Accepted	Integer	Auto	Total jobs accepted all-time.
Jobs Completed	Integer	Auto	Total jobs completed (not backed out).
Jobs Backed Out	Integer	Auto	Total jobs backed out after accepting.
Back-Out Rate	Percentage	Auto	Backed Out / Accepted. Display as percentage.
Last Back-Out Date	Date	Auto	Most recent back-out. Null if never.
Notes	Multi-line	No	Context (e.g., "backed out due to family emergency – understandable").

Auto-calculation suggestion: Start all new caregivers at 5.0 reliability. Deduct 0.5 for each back-out. Add 0.1 for every 10 completed jobs (caps at 5.0). Admin can override at any time.

D2. Composite Internal Score

The composite internal score is a single number (1.0 – 5.0) displayed prominently on the admin's caregiver profile view. Suggested weighting:

Component	Weight
Interview Score	20%
Communication Score	30%
Reliability Score	50%

The composite score is used in the caregiver matching/invitation system. Higher-scored caregivers are invited first, subject to area and qualification matching.

The weights are configurable in admin settings. Amy may want to adjust these as the system matures.

S2Verify Background Check Integration

Background checks can be initiated two ways: by admin from the admin dashboard, or by the caregiver from their own portal. Both paths go through the same S2Verify API flow. The caregiver-facing button includes cost-awareness language to prevent casual or premature submissions.

E1. Integration Flow

Path 1: Admin-Initiated

Admin reviews application and references, then clicks "Initiate Background Check" on the caregiver's admin profile. No guardrail needed — admin knows when the timing is right.

Path 2: Caregiver-Initiated

The caregiver sees a "Start Background Check" button on their own portal, but only after they reach a specific status (Interview Scheduled or later). The button is accompanied by a clear message explaining the cost to the agency and asking the caregiver to confirm they are ready to move forward.

Caregiver-facing language: "Background checks are required for all Sitterwise caregivers and are paid for by Sitterwise. Because this is a real cost to our agency, we ask that you only initiate this step when you are confident you will be joining our team and ready to begin working soon. If you have questions, please contact us before proceeding."

Shared Flow (both paths)

- Initiator clicks button → confirmation dialog appears with cost acknowledgment
- System sends caregiver data to S2Verify API: full name, date of birth, address, SSN (if collected — see note below)
- S2Verify processes the check and returns results via webhook or polling
- Results are stored on the caregiver profile (admin-only visibility)
- Status badge updates: Pending → Clear → Review Required → Failed
- Admin receives notification email when check completes

SSN HANDLING: If S2Verify requires SSN, the caregiver should enter it directly into a secure form that transmits to S2Verify — it should NOT be stored in the Sitterwise database. The admin triggers the request, then the caregiver receives a secure link to enter their SSN, which goes directly to S2Verify.

E2. Background Check Status on Profile

Field	Type	Req?	Notes
BG Check Status	Badge	Auto	Not Initiated / Pending / Clear / Review Required / Failed

BG Check Date	Date	Auto	Date the check was initiated
BG Check Expiration	Date	Auto	Typically 1-2 years from check date. Configurable.
Expiration Warning	Alert	Auto	Coral alert banner if expiring within 60 days. Block availability posting if expired.
BG Check Report	Link/PDF	Auto	Link to full report on S2Verify. Admin-only.

E3. API Requirements

Aji will need to:

- Register for S2Verify API access and obtain credentials
- Review their API documentation for the specific endpoints (background check initiation, status polling or webhook setup, result retrieval)
- Build a secure SSN collection flow (one-time-use tokenized form, data goes directly to S2Verify, never stored locally)
- Handle webhook responses for real-time status updates
- Build admin notification for completed checks (email to amy@sitterwise.com)

Admin Caregiver Profile View

The admin dashboard provides a single, comprehensive view of each caregiver that aggregates all four data systems. This is the screen Amy and Lissa use to make hiring and job-assignment decisions.

F1. Profile Header

- Photo (from application or updated headshot)
- Full name, phone, email
- Status badge: Applicant → Interview Scheduled → Hired → Active → Inactive → Suspended → Terminated
- Internal composite score (star with number, admin-only)
- Client review average (star with number, admin-only — not shown to other clients)
- Job count badge (e.g., "147 jobs completed")
- Acceptance rate badge (e.g., "82% acceptance rate")
- Background check status badge
- CPR/First Aid expiration status
- Trustline status

F2. Profile Tabs

Tab	Content
Application	Full application data as submitted. Read-only snapshot.
References	All 4 reference responses with individual ratings and comments. Status tracker (0/4 to 4/4).
Reviews	Client reviews and star ratings. Admin can see all; caregiver sees her own. Not visible to clients.
Internal Rating	Interview score, communication score, reliability score, composite. Editable by admin. Admin-only.
Engagement	Job count, acceptance rate, avg response time, jobs this month/quarter, last job date. Admin-only.
Compliance	Background check status, CPR expiration, Trustline status. Upload and date tracking.
Job History	All past jobs with dates, families, ratings received, back-outs flagged.
Notes	Internal admin notes (free-text, timestamped, attributed to staff member).

F3. Caregiver Status Lifecycle

The caregiver moves through these statuses. Each transition can be manual (admin) or triggered by system events.

Status	Description
Applicant	Application submitted. Not yet reviewed.
Under Review	Admin is reviewing application. References sent.
Interview Scheduled	Admin has scheduled an interview.
Background Check	Interview completed. BG check initiated.
Hired / Onboarding	BG check clear. Caregiver completing onboarding steps (Stripe, Trustline, etc.).
Active	Fully onboarded. Can post availability and receive job invitations.
Inactive	Voluntarily paused. Can reactivate.
Suspended	Admin-initiated hold. Cannot receive jobs. Used for compliance issues.
Terminated	Permanently removed. Record retained for history.

Data Model Summary

High-level entity relationships for Aji's database design:

Core Tables

- caregivers — Master profile record. One per caregiver. All statuses.
- caregiver_applications — Snapshot of submitted application. One per caregiver. Immutable after submit.
- caregiver_experiences — Up to 3 per application. Linked to caregiver.
- caregiver_agreements — Signed agreement PDFs. Two per application (verification + agreement).

Reference Tables

- reference_requests — One per reference contact (4 per caregiver). Tracks token, status, sent/completed dates.
- reference_responses — One per completed reference. Linked to request. Contains all ratings and text responses.

Review Tables

- client_reviews — One per completed job per client. Linked to caregiver + booking. Contains all star ratings and text.

Internal Rating Tables

- caregiver_internal_ratings — One per caregiver. Contains interview score, communication score, reliability score, composite. Updated by admin.
- caregiver_rating_history — Audit log of all rating changes with timestamp, old value, new value, admin who changed it, and notes.

Compliance Tables

- background_checks — One per check (a caregiver may have multiple over time). Linked to S2Verify. Status, dates, report link.
- certifications — CPR/First Aid and Trustline. Expiration dates, uploaded documents, compliance flags.

Build Priority

Phase 1: Application Form + Admin View

- Build the multi-step application form (Steps 1-8)
- Build admin caregiver list with search/filter
- Build admin caregiver profile view (Application tab)
- Build caregiver status lifecycle management

Phase 2: Reference System

- Build reference request email trigger (SendGrid)
- Build tokenized reference form
- Build reference response storage and admin display
- Build reminder/expiration logic
- Build cross-check validation (applicant vs. reference answers)

Phase 3: Internal Rating System

- Build interview score entry
- Build communication score (ongoing updates)
- Build reliability score (auto-calc from job history)
- Build composite score calculation and display
- Build rating history audit log

Phase 4: Client Review System

- Build review request trigger (post-checkout)
- Build client review form
- Build review display on caregiver profile (admin + client + caregiver views)
- Build moderation controls

Phase 5: S2Verify Integration

- API integration with S2Verify
- Secure SSN collection flow
- Status tracking and webhook handling
- Compliance monitoring (expiration alerts)

End of Specification — Sitterwise Caregiver Profile System v1.0
